About me

Brazilian, 27 years old, I am an economist and a master's student in economics, dedicated to applying my knowledge and skills to high-impact initiatives. Over the last few years I have been able to cultivate and apply diverse skills, ranging from preparing and presenting reports to impact evaluation, using data analysis and econometric modeling for causal inference. I believe that my enthusiasm for public policies along with my analytical and methodologically rigorous approach makes me a valuable asset, allowing me to contribute to significant projects.

Education

Universidade de São Paulo (USP) 2022 - currently
Masters in Applied Economics
Faculdade de Economia e Administração de Ribeirão Preto (FEA/RP)
