I am a master's student in Economics, deeply passionate about leveraging data to drive meaningful solutions. My journey began during my undergraduate studies, where I could understand the power of data in various sectors – from business and public policy to personal decision-making. An undergraduate research project cemented my interest in this field, guiding me towards a master's program as a natural next step. Here, courses in statistics and econometrics have only fueled my enthusiasm for causal inference and machine learning. I believe that my analytical rigor and self-taught profile, along with my enthusiasm for continuous learning, make me a valuable asset. For a closer look at my projects and research, please visit my personal website.

Education

2022–2024	**Master's degree in Applied Economics**. Universidade de São Paulo (USP) - Faculdade de Economia e Administração de Ribeirão Preto (FEA/RP)
2017–2021	**Bachelor's degree in Economics**. Universidade Federal do Rio de Janeiro (UFRJ)
